

# LiteZilla

## FRAME & GRID COLOR GUIDE

Choose from the options below to customize the frame and backgrid of your LiteZilla.

LiteZilla units are built using  $\frac{3}{4}$ " HDPE in either **BLACK** or **WHITE**.

The frame can be upgraded to a hardwood surround, custom-stained in any color you choose. The HDPE covers the full front of the unit, so the front always stays black or white, and the hardwood detail is seen along the sides.
