

LiteZilla Quick Guide To:

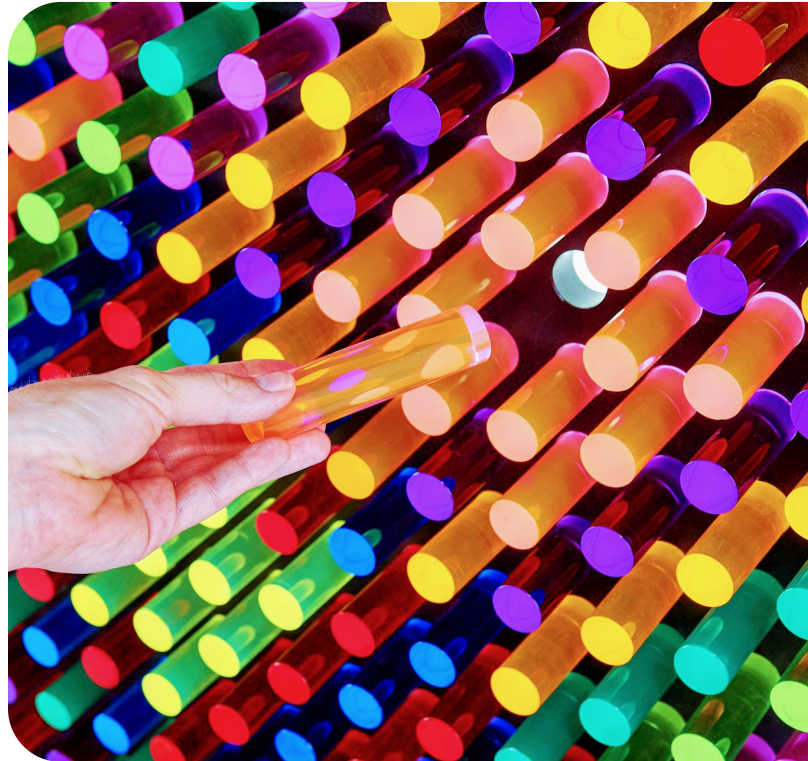

ACRYLIC LITEPINS

About the LitePins

Every LiteZilla comes with a stunning array of LitePins in every color of the rainbow, designed to captivate hearts and light up your world. They are engineered to fit comfortably into the board's holes and illuminate instantly when inserted.

What sets our LitePins apart?

Our LitePins have been carefully curated exclusively for LiteZilla to offer you the most vibrant and radiant color experience. It's a feature that makes us unique in the industry, and you won't find anything quite like it elsewhere.

Custom Colors

Available Upon Request!

Plus, we've ensured that each LitePin is cut to perfection and polished to create a smooth, edge-free design. Don't worry about sunlight, moisture, or heat – LitePins remain resilient and maintain their radiant allure no matter what life throws their way.

Welcome to a world of boundless colors and endless possibilities with LiteZilla.

Caring for Your LitePins

- LitePins should be used on a soft surface to ensure their longevity. Dropping LitePins on a hard surface, such as tile or stone, can lead to gradual wear and small chips developing on the ends. If your floor is a hard surface, we recommend placing a runner or a soft mat underneath your LiteZilla for added protection

LitePin Safety

- Both our Standard LitePins (4" long x 1" diameter / 10.16 cm x 2.54 cm) and our Mini LitePins (2.25" long x 1" diameter / 5.72 cm x 2.54 cm) successfully pass the Consumer Product Safety Commission's (CPSC) Small Objects Tester, meeting all choking safety standards. LitePins are designed without sharp edges and are resistant to releasing small pieces after exposure to impact, flexure, torque, tension, or compression. To ensure safety and prevent injuries, please use LitePins only for their intended purpose.

Extra LitePins

- Occasionally, you may find LitePins that don't fit perfectly or have minor color variations. These are industry-standard variances. If you encounter an oversized LitePin, feel free to discard it. We've included extra LitePins to ensure you're well-equipped.

Make sure germs never stay to play!

Cleaning your LitePins

- The LitePin Sanitation Basket turns your household dishwasher into a deep cleaning machine. Made from 100% eco-friendly polypropylene, the basket can endure high temperatures and heavy load settings.

LitePin Sanitation Basket

Using the Sanitation Basket

- 1 Clear the dishwasher bottom rack and remove silverware holder.
- 2 Place the empty sanitation basket on bottom rack-allowing the rack prongs to go through the bottom holes of the basket to hold it in place. The basket should be nestled securely without bending any of the prongs.
- 3 Collect your LitePins and distribute them evenly in the Sanitation Basket. For optimal results, do not exceed 220 LitePins per load.
- 4 Place your desired dishwashing detergent into your washer and run a cycle on high heat with heat drying.
- 5 While you wait, use a disinfecting wipe to clean your LiteZilla unit, grid holes, and cubbies.
- 6 When the dishwashing cycle is complete, remove your sparkling clean LitePins from the basket. If necessary, allow LitePins to cool and dry before playing.
